Attributes and advantages

SAFETY - UNPARALLELED PROTECTION

In the demanding world of cargo transport, securing the integrity of your barrels is non-negotiable. When transporting valuable or hazardous materials, you need a solution that leaves no room for error. That's where Drumclip delivers unparalleled protection.

Our patented design, rigorously tested and certified to the highest safety standards, provides a solution that not only mitigates risks but ensures the integrity of your cargo under the most challenging conditions. Whether dealing with critical resources or hazardous substances, Drumclip empowers your operations with unmatched reliability and strength.

REDUCE COSTS - MAXIMIZE SPACE

Drumclip cuts costs compared to pallets. Its compact design minimizes storage space, freeing up valuable warehouse capacity. Choose Drumclip to boost efficiency, strengthen drum security, and reduce operational expenses.

EASY TO USE - SIMPLIFYING OPERATIONS

Choose for simplicity when securing your barrels with Drumclip. In just 4 easy steps, you can guarantee the stability and safety of your cargo, aligning seamlessly with the high standards of ISTA 3E pallet stability and EUMOS 40509 load unit stability.

Streamline your process with Drumclip to optimize your day-to-day operations and implement a certified solution that you can rely on. If you want extra certification from TÜV for secure load handling, you can follow a simple 2-step process.

USER INSTRUCTIONS IN 6 EASY STEPS

Find out more in the Drumclip Manual Guide Handbook

HOW TO USE DRUMCLIP WITH STRAPPING

PLACE DRUMS ON PALLET
Position 4 UN 200 litre (50 gallon) on a pallet, ensuring size and quality.

PLACE DRUMCLIPS
Visually inspect and position 2 Drumclips, 1 on each opposite side, on the outer drum facing outward.

APPLY HORIZONTAL STRAP
Secure a strap tightly in the middle of the drums using certified straps. Signode, Cordstrap or comparable.

ADD VERTICAL STRAP
Apply and secure a vertical strap over the Drumclips and under the pallet.

LOAD PALLETS INTO TRAILER
Use a forklift, expose outer Drumclips, and place the skids in a trailer on non-slip mats.

SECURE LOAD TO TRAILER
Use a tension strap, ensuring it's not twisted, and secure pallets to the vehicle with an (Ergo) ratchet strap.

EXCELLENCE IN CRAFTSMANSHIP FROM THE NETHERLANDS

Skillfully crafted in the Netherlands, Drumclip is a symbol of innovation and precision. With its roots in the injection molding production company since 1987, our production facilities bring reliable skill and craftsmanship to the making of this product for industry.

Drumclip stands out for its cutting-edge design and the dedication of our young, international team. United by a passion for excellence, this diverse team brings fresh perspectives to the ongoing challenge of drum security.

Choose Drumclip for a product that embodies Dutch craftsmanship and the dynamics of a forward-thinking team.
