

This exploded view diagram illustrates the assembly of a car lift system. The central component is a heavy-duty metal frame with a central vertical column and two side columns. A motor is mounted on the left side of the frame. A long horizontal beam is positioned above the frame, supported by pulleys. Various cables, including a thick black cable and several thinner ones, are shown. Other components include a coiled spring, a small black box, a control panel, and several smaller mechanical parts like bolts and nuts. The diagram shows how these parts fit together to form the complete lift system.
