

HEAVY DUTY LOGISTIC SHORING STRAP

FEATURES AND BENEFITS

› 4 SECUREMENT POINT DESIGN

Greater cargo control and stability

› REPLACE MULTIPLE TRADITIONAL STRAPS

Reduce inventory count, handling time, and replacement costs

› REDUCE COSTLY FREIGHT DAMAGES

Helps minimize cargo movement and potential freight damage through stronger, more balanced securement

› HIGHER WORKING LOAD LIMIT

Enhanced strength and performance for demanding cargo securement applications

› LIGHTER THAN TRADITIONAL BEAM SOLUTIONS

Easier handling with improved transport efficiency

› BUILT FOR DEMANDING LOGISTICS ENVIRONMENTS

Ideal for rolling and shifting cargo, including carts, totes, crates, and similar applications across distribution, manufacturing, route delivery, and fleet operations

FOUR POINTS OF SECUREMENT. GREATER CONTROL.

The Kinedyne Heavy Duty Logistic Shoring Strap is a patent-pending securement solution engineered for demanding logistics, manufacturing, and distribution environments where speed, efficiency, and cargo control matter.

Its innovative 4-point securement design provides superior load stability for rolling or shifting cargo while reducing the need for multiple traditional straps or heavier securement equipment. With a higher working load limit than traditional logistic straps, it delivers greater strength and stability for demanding cargo securement applications.

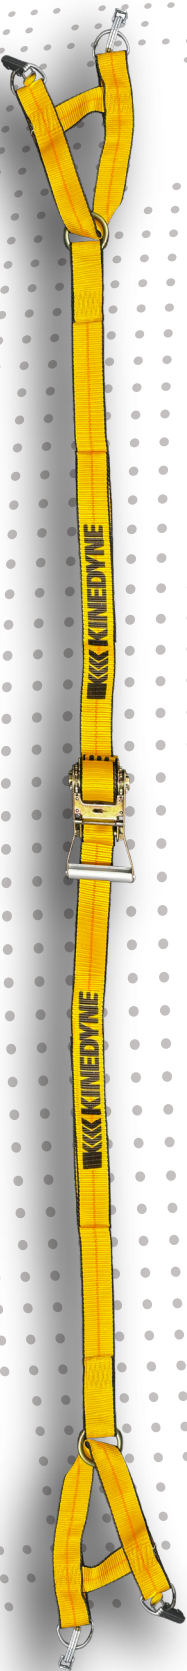

When traditional shoring beams aren't practical, this lightweight alternative provides a flexible securement solution that is easier to install, reposition, and remove during loading and unloading operations.

By consolidating securement into a single, high-performance solution, operators can reduce handling time, simplify inventory, lower replacement costs, improve loading efficiency, and help minimize the risk of cargo movement and costly freight damage.

Less equipment. Faster securement.
Greater operational efficiency.

Specifications:

PART NUMBER:	16105
WIDTH:	2"
STANDARD LENGTH:	16'
WORKING LOAD LIMIT:	2,500 LBS.
TRACK COMPATIBILITY:	SERIES E & A LOGISTIC FITTINGS
DESIGN:	PATENT-PENDING 4-POINT SECUREMENT
STANDARD COLORS:	GOLD, BLUE, GRAY, RED
CUSTOMIZATION AVAILABLE:	LENGTH, COLOR, BRANDING, AND CONFIGURATION OPTIONS AVAILABLE (MINIMUM QUANTITIES APPLY)
